

FINANCE.

Welcome at Solar Finance.

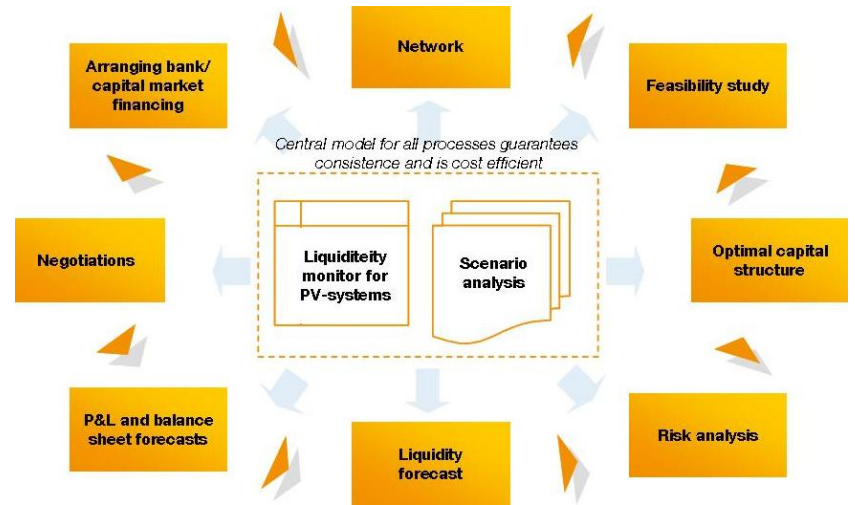

Solar Insurance & Finance (Solarif) is an internationally operating independent insurance broker, specialised in the insurance of solar energy installations, also known as PV insurance. Solarif insures roof-top PV installations of private clients and businesses as well as ground-based solar energy parks in the Netherlands and all EU countries, Turkey and The People's Republic of China.

Our expertise

You are assured of receiving our very best service while we solve your financing issue in the most cost efficient and adequate way. Our team offers a unique mix of expertise, experience and skills. We guarantee excellent process management and simultaneously an efficient process that will take the weight of your shoulders.

Focus, drive and service:

Your needs, what we provide.

Network

With Solar Insurance & Finance you have an extensive and solid network of installers and manufacturers on the one hand and financiers and investors on the other hand to your disposal. A network with which we can switch easily to meet your needs.

What makes us unique

Our exceptional knowledge of solar energy and extensive experience in financing issues makes us unique in this sector. We offer you tailor made full service advisory services. Extraordinary sector knowledge and an extensive and solid network. Some aspects truly give us the step ahead you need.

Our services

We have a broad range of services to fit your needs. Whether you are a private client or a business, we have a solution for everybody!

Project financing

- Special bank financing
- Tailor made, with or without certain collateral and redemption schemes

→ We focus on a healthy financing structure, that fits your business and without taking irresponsible risks. Solar IF advises on any possible structure, to your situation.

Offbalance financing

- Operational and capital lease products
- Flexible liquidity
- Increasing feasibility
- Higher returns

→ Solar IF mediates between companies and suppliers of financing products. Complex products where small differences can have big consequences.

Micro credits

- A PV-system can be an attractive investment not only for sustainability but also to reduce future energy costs. However, a large investment is needed before you can make use of these advantages.

→ Solar IF has extensive experience in arranging micro credits. Our knowledge helps you to increase the project's feasibility and to create a smooth and swift process.

Financial engineering

- Investment funds
- Guarantee funds
- Lease constructions

→ The market for pv-systems is relatively new and offers a great number of possibilities for financial structuring. With our knowledge and expertise we assist you in implementing the most optimal structure to fully exploit your financial possibilities.
